

PREPARATION CHECKLIST

BEFORE YOU UPLOAD

Not everything on this list is essential for everyone; for instance you may already own Photoshop so you won't need GIMP, but checklists help us to avoid overlooking important steps, so in this case I would check it off anyway, so at a glance you can see that area has been covered. Underlined blue words are links so you can go straight to the relevant resource. Print this list tick off the blue boxes and finally tick off the black box when you finish the section. Follow this system, you won't miss a thing and you should get it as right as you possibly can.

1. PHOTOGRAPH YOUR ART

- If you're a good photographer watching the [VIDEO preventing common photo problems](#) should be enough, not that you need any tips but there are requirements/recommendations that are specific to this site. For less experienced photographers, watching this could save you hours of trial and error and frustration. Starting with a good image will save time and help to make a professional impact. For greater depth of information try our [GUIDE TO PHOTOGRAPHY FOR THE WEB](#)
-

2. GET YOUR IMAGES RIGHT

- If you don't have any image editing software watch the [VIDEO installing your image editor](#) and follow along
- Once it's installed, see how to crop and edit images effectively with the [VIDEO fixing common photo problems](#)

3. GET THE FILES RIGHT

Check your images are as follows

- File format **.jpeg .jpg .JPEG .JPG**
- File size approx. **300 KB** or slightly larger
See how to save images in the right format and size by watching the
- [VIDEO saving your image files](#) or you can read our
- [GUIDE TO IMAGE SPECIFICATIONS](#)

4. GET THE MONEY RIGHT

Get this part wrong and you'll get less than you should or skip setting up your free PayPal account (so we've no way of paying you) and get nothing at all. It's important so definitely sort this out before you upload your work. A good place to start is our

- [GUIDE TO PRICING ART](#)
- [CALCULATE YOUR SERVICE COSTS](#)
- [CONVERT YOUR PRICES TO \\$AUD](#)
- [SIGN UP FOR PAYPAL](#)
